**IEEE2, IEEE-488 INSTRUMENT BUS MODULE**

MODULE 2050

This module, (2050) provides an IEEE-488 bus remote control path for MITC-400 series of products. This facilitates use of Mux/Demux, Data Link Test Sets, etc. in automated systems. The same ASCII-based command set is used as the unit's standard RS-232 interface.

- Standard HP-IB connector
- Address settable at rear panel
